

ABOUT ME

Engineer

Since 2018

A driven engineer with broad experience in the industry, with a successful track record in solving diverse Engineering problems, confident in bringing a fresh perspective to your organization and its various business problems.

EXPERIENCE

CanvasJS

June 2023 – July 2023 | Software Developer

- › Worked on clientside charting library product using vanilla Javascript implemented with canvas element API of HTML
- › Created 5000+ automated testcases in a span of a week with cypress framework
- › Carried out client support activities on dedicated forum

Vualapp

Aug 2022 – April 2023 | Full-stack Developer

- › Collaborated with a 2 person founding engineering team to automate the invoice aggregation procedure, making the platform a viable solution for accounting customers.
- › Contributed to all aspects of product building, including development, testing, and documentation.
- › Effectively contributed to implementing modularity, scalability, and bug fixes for the existing codebase.
- › Primary stacks used include Vue, AWS (Lambda), and Supabase, with Gitlab for version control and CI/CD.
- › Implemented an event-based microservice on serverless compute, specifically AWS Lambda.
- › Facilitated the successful migration of the product between AWS accounts by transferring configurations, instances, security groups, and identity and access management, while documenting the entire procedure.
- › Helped the organization build a sustainable browser automation solution using Puppeteer/Playwright.

SIBCA Electronics Equipment

April 2019 – June 2021| Technichal Service Engineer

- › Programmed, commissioned, and serviced Extra Low Voltage systems and Central Battery systems.
- › Communicated with clients, delivered services, and planned resources.
- › Delivered technical project documentation.
- › Demonstrated hands-on experience in operating and troubleshooting various scalable electronic systems

EDUCATION

TKM College of Engineering

2014 – 2018 | Bachelor of Technology in Electronics and Communication

NAAC Accredited Govt-Aided Engineering college under Kerala University

SKILLS

JavaScript

Expert Level

Completed 69-hour beginner to Expert JavaScript course from udemy.

ES6

Node

React

Redux

Vue

Object Oriented Programming

boolean logic

inheritance
